Post to the Treasurer

CANTERBURY MINERAL & LAPIDARY CLUB INC.

Mrs L. Alexander
478 Two Chain Road
RD7 Christchurch 7677
New Zealand

<http://www.cmlclub.org.nz>

The Club has a well equipped workshop and there are regular classes in lapidary from beginner to advanced.

You can learn how to: -

- Tumble polish stones
- Make pictures out of moss agates
- Prepare cabachons
- Polish fossil wood
- Make jewellery
- Display your prize rocks
- Carve in stone or bone

CANTERBURY MINERAL & LAPIDARY CLUB INC.

We share an interest in the geology of how our landscape is formed, the story of its fossils, and how to reveal the beauty of nature's rocks, crystals and minerals.

Crystals and Minerals

If you are interested in

- Crystals
- Micro minerals
- Minerals

Swap samples and information with other enthusiastic collectors. Use the club library's many reference books to help with identification.

Amethyst crystals from a geode. A brilliant example of what can be found in New Zealand with lots of luck and spending many days in the field searching.

Visit us at our web site for the latest news:-

Fossils

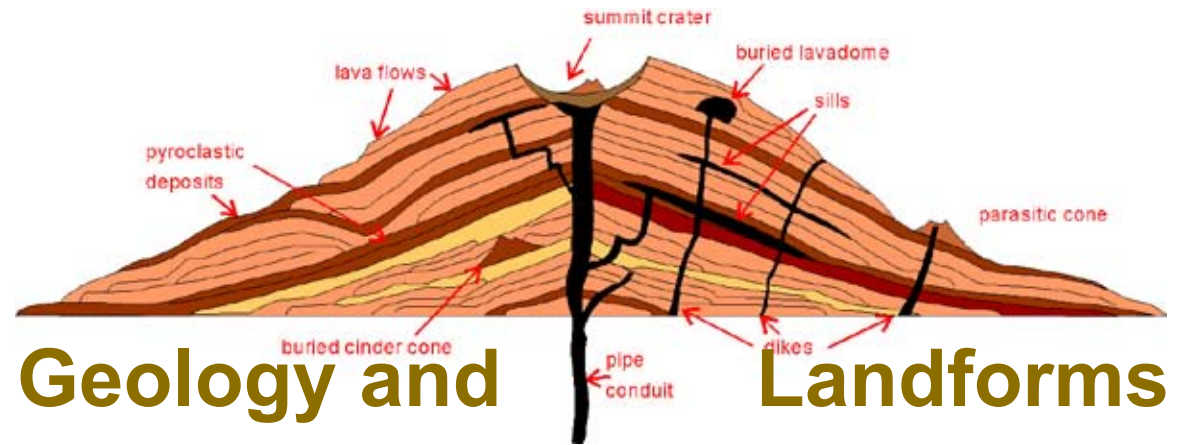

Fossils are the history of our evolution. They give us a glimpse of life millions of years ago.

Find: -

- Trilobites those weird extinct creatures of hundreds of millions of years ago
- Fossils of great sea creatures that scavenged the Cretaceous seas

We are still looking for a New Zealand dinosaur!

Geology and Landforms

The landscape around us is a constant source of interest and enjoyment.

Learn about: -

- Plate tectonics
- Earthquakes and fault lines
- Volcanoes
- Folding and buckling of the land
- Erosion and sedimentation shaping the landscape

Field Trips

Enjoy the natural environment, learn how it was created * Experts to identify that funny rock * Have a great day out with convivial company
